Cari colleghi,

Il giorno **19 dicembre sono previsti i seguenti seminari:**

ore 11:30 in aula COB2
- "Design of diruthenium metalloproteins as structural models: synthetic aspect, structural characterization and properties" - Dott. Aarón Terán More (Universidad Complutense de Madrid)

dalle ore 14:00, in aula CH2
- "First-principles study of the structural and electronic properties of BN-ring doped graphene" - Dott.ssa Laura Caputo (UCLouvain (UCL), Institute of Condensed Matter and Nanosciences(IMCN), Louvain-la-Neuve, Belgium)
- "Exploration of Fröhlich polarons from perturbative and variational approaches" - Dott. Bogdan Guster (UCLouvain (UCL), Institute of Condensed Matter and Nanosciences(IMCN), Louvain-la-Neuve, Belgium)

Vi invito a partecipare e ad estendere l'invito ai vostri collaboratori.
