

UNIVERSITY OF NAPOLI "FEDERICO II"

POLYTECHNIC AND SCIENCE SCHOOL

Department of Chemical Sciences

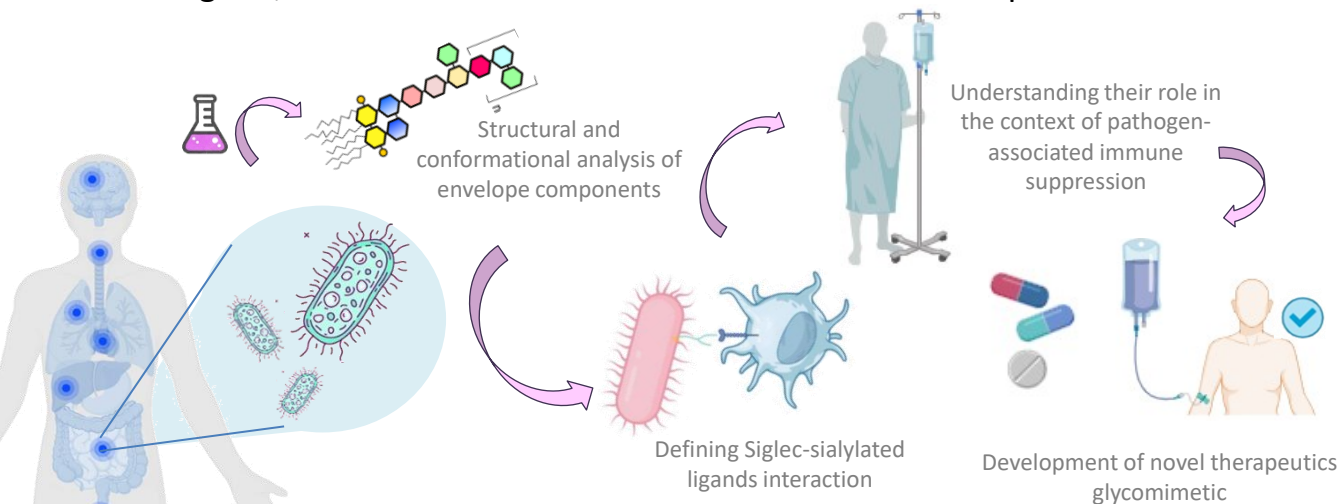

Ph.D. School in Chemical Sciences (XXXVII Cycle)

Second year activity

Extraction and characterization of bacterial glycans and study of their interactions with Siglecs; evaluation of their role within host immune response.

Ph.D. Student Marta
Tiemblo Martín

**Title FULL
CHARACTERIZATION OF
BACTERIAL SIALYLATED
ENVELOPE COMPONENTS**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 956758
